Working History

Uqidev, Dhaka (Remote – Full Time) [Jun 2021 - current]

- Working as a React Front End Developer. Developing dynamic and complex user interfaces. Have experience of working with E-commerce website. Connected with senior developers. Learned and researched new tech sacks.

Woiqo, Dhaka (Remote – Full Time) [Jan 2020 – April 2021]

- Worked as a Frontend Web Developer. Worked with React.js and developed simple dynamic/static web apps. Implemented many templates with React and HTML.

Maks Inc, UK (Remote – Project Based)

- First project-based job in my dev career. Developed dynamic and complex HR Management Software for Maks Inc. It helps them to manage their projects, employees, clients and more.

Projects / Works :

01. HR Management System

Next level HR management system created for Maks Inc. It's a dynamic full stack and advanced admin panel where admins can manage their whole company work.

Status: Featured.

Technologies: Next.js, Redux, TailwindCSS, Antd, Nest, MySQL, REST API

02. IslamiBoi

A dynamic full stack E-commerce application for Islamiboi. Helps readers and writers to publish and purchase books from web through this web app. My role was to manage the UI and integrate the APIs of this app.

Status: Featured.

Technologies: Next.js, Redux, TailwindCSS, Antd, Nest, MySQL, REST API

03. Project Management Software

A Project Management software for any teams to manage their projects and tasks. Flexibility of connecting with project members with interactive tree, Kanban board and timeline view. It will help teams to manage and work with their projects faster by syncing with other members.

Status: On going.

Technologies: React, Redux, TailwindCSS, Antd, Firebase

06. Nakuti

Solo E-commerce application for my mentor. It will help him to show his products to his clients and customers.

Status: Featured.

Technologies: Next.js, Redux, TailwindCSS, Antd, Firebase
