Projects

Islamiboi
A full stack E-commerce web application for Islamiboi. This app help thousands of buyers to buy their favorite books online from home & help publishers to sell their books! It helped Islamiboi to raise up to $5K.

My role was to-
- Create dynamic web pages with Next.js.
- Integrate REST API.
- Use Redux Toolkit for state management.
- Make User Experience better.
- Style the frontend with TailwindCSS & Ant Design.

Alim Industries Limited
Alim Industries Limited play a great role to invent modern farming machineries for better agriculture. This website helps Alim Ind. to showcase their machineries online & farmers can choose the best machineries for better food production.

My role was to-
- Create the full website with Next.js
- Provide a beautiful design.
- Implement the design with component block.
- Develop dynamic web pages.
- Make the website device friendly.

HR Management System
HR management system created for Maks Inc. It's a dynamic full stack and advanced HR Management system to manage employee of them.

My role was to-
- Create frontend architecture.
- Create dynamic form, table & pages.
- Use Redux for centralizing app states & logic.
- Implement REST APIs.
- Optimize code for faster experience.

Project Management Software
A Project Management software for any teams to manage their projects and tasks. Flexibility of connecting with project members with interactive tree, Kanban board and timeline view.

My role was to-
- Create frontend & firestore architecture.
- Implement login functionality with Firebase.
- Implement DnD feature for better experience.
- Implement tree, kanban & timeline view for task managing.
- Realtime chatting functionality for discussion.
